Preface 5

- Prerequisites 5
- Hardware and software requirements 5
- Installing the files from the CD onto your hard drive 7
- Completing the exercises in this book 8
- Font issues 9
- Conventions used in this book 9

Chapter 1: Reviewing templates and EDDs 11

- Importing elements from an EDD 12
- Importing formatting and elements from a structured document 14

Chapter 2: Analyzing document structure 17

- Listing document types 18
- Analyzing user manuals 19
- Breaking down the components of a user manual 20
- Completed analyses 23

Chapter 3: Modifying and creating EDDs 25

- Modifying an EDD and updating your documents 26
- Creating an EDD file from a structured document 28
- Creating a new EDD 29

Chapter 4: Creating container elements 31

- Setting up a top-level Chapter element 32
- Creating a Title element definition 35

On your own: Creating an Intro element definition	36
On your own: Creating the Section element definition	37
On your own: Creating a Para element definition	38
Checking your work	39
On your own: Creating list elements	41
On your own: Creating Note, Caution, and Warning elements	42
Creating the Emphasis, BookTitle, and Term elements	43
Creating the Footnote element	45
Setting up table definitions	46
Chapter 5: Creating object elements	49
Creating a system variable definition	50
Creating a cross-reference element	52
Setting up ID-based cross-references	54
Creating a graphic element definition	57
Setting up graphics that require captions	59
Creating a marker element definition	60
Chapter 6: Refining element definitions	61
Setting up inclusions for IndexEntry elements	62
Setting up exclusions for IndexEntry elements	63
On your own: Setting up inclusions and exclusions for the Graphic element	64
Inserting children automatically	65
On your own: Inserting ListItem elements automatically in lists	67
Using prefixes and suffixes	68
Chapter 7: Assigning formatting to container elements	69
Assigning a paragraph tag to an element	70
On your own: Assigning more paragraph tags to elements	72
Assigning character tags to an element	73
On your own: Assigning character tags to the BookTitle and Term elements	74
Using a format change list to assign formatting	75

Chapter 8: Writing context rules for complex formatting 79

- Controlling formatting based on hierarchy level 80
- Setting up formatting rules for first-level headings 82
- Formatting ListItem elements based on the list type 84
- On your own: Adding a context rule for bulleted lists 86
- Assigning a marker type based on the document type 87

Chapter 9: Structuring unstructured documents 89

- Generating a structure rules table 90
- Building conversion rules for character tags 92
- Testing the conversion rules 93
- Building conversion rules for cross-references 94
- Building conversion rules for markers 95
- Building conversion rules for paragraphs and system variables 96
- Building conversion rules for tables 98
- On your own: Finishing up conversion table mapping 99
- Wrapping elements 100
- On your own: Fine-tuning the EDD and conversion table 101
- On your own: Finishing the EDD and conversion table 103
- Identifying overrides during conversion 104
- FrameMaker 7.2: Specifying the root (top-level) element in conversion tables 106

Appendix A: Changes to the EDD and the conversion table 109

Appendix B: What's new in FrameMaker 7.2 111

- Toolbar modifications 111
- Multiple undo/redo 112
- More structured templates 113
- Support for the Darwin Information Typing Architecture (DITA) 114
- Enhanced conversion to structured FrameMaker 114
- Support for Extensible Stylesheet Language (XSL) 115
- Support for schema 115
- New documentation on migrating to structure 116
