Preface 19

What's in this book 19

Chapter 1: So, what's a technical writer? 25

Knowledge of technology 26

Ignorance is bliss 28

Who treats the doctor and who documents for the writer? 29

Writing ability 29

Miss Thistlebottom was right... 30

Organizational skills 32

Strong detective (and people) skills 34

Chapter 2: The technical writing process 37

What you can expect (maybe) 37

Authoring with templates and with structure 40

Template-based authoring 41

Structured authoring 42

Are templates and structure *really* that important? 44

Templates and structure are good for your professional well-being 46

Chapter 3: Very necessary evils—doc plans and outlines 47

- What's a doc plan? 48
 - Who writes the doc plan? 51
 - Any formulas for writing doc plans? 52
- Outlining—it's not just for high school papers anymore 54
 - What goes into the outline? 54
 - How many deliverables should there be? 56
 - Writing the outline 57

Chapter 4: The Tech Writer's Toolbox 61

- Content/text development tools for printed content 62
- Graphics software and clip art packages 65
- Rich media tools 66
- Help or web authoring tools 67
- File conversion and single-sourcing utilities 67
- Other helpful software 69
- Computers and ergonomics 70

Chapter 5: Getting information 73

- Technical specifications and other development content 74
 - The benefits of a spec 74
 - The drawbacks of a spec 75
- Prototypes and software under development 76
 - The benefits of prototypes and prerelease software 78
 - The drawbacks of prototypes and prerelease software 79
- Legacy content 81
 - The benefits of legacy content 81
 - The drawbacks of legacy content 81

- Developers and subject matter experts 82
 - The benefits of developers and SMEs 83
 - The drawbacks of developers and SMEs 83
- Interviews with users 87
 - The benefits of interviews with users 87
 - The drawbacks of interviews with users 88

Chapter 6: Finally—it’s time to start writing 89

- Audience, audience, audience 90
 - K.I.S.S. 92
 - Inclusive language 93
 - Analyzing your audience without spending a fortune 94
- Style and terminology 97
- Different types of content 98
 - Interface information 98
 - Reference information 101
 - Conceptual information 102
 - Procedural information 103
- Topic-based writing and its benefits 103
- Dealing with the inevitable schedule changes 106
- Experience is the best teacher 107

Chapter 7: Writing task-oriented information 109

- Elements of a procedure 110
- Introducing the procedure 112
- Breaking down a task into steps 112
- Including the results 113
- Adding notes, warnings, and cautions 115

- Using bulleted and numbered lists 117
- Letting illustrations tell the story 118
- Organizing information in tables 120
- Inserting cross-references 121
 - Cross-references in printed documents 122
 - Links in online content 123

Chapter 8: Visual communication 127

- What sort of visuals should I use? 128
- Using graphics in content 129
 - Understanding graphic file types 129
 - Scope of an illustration 133
 - Displaying information from your computer screen 136
 - Placing graphics in your content 137
- Using rich media content 141
 - Creating animated screen shots and other rich media 141
 - Understanding rich media file formats 142
 - Adding rich media files to your content 143
- Hey, I'm a writer, not an artist! 144

Chapter 9: The importance of being edited 147

- Preventive measures 150
 - Reviewing doc plans and schedules 150
 - Establishing style guidelines 151
 - Deciding on terminology 152
 - Examining legacy content 152
 - Reviewing early chapters 153
- Copy editing vs. technical editing vs. production editing 153

Editing the content—what you and your editor can expect 154
 What an editor can expect from you 155
 What you can expect from an editor 157
Editorial checklists 159
Working with review comments 161
The reality of time constraints 162

Chapter 10: Indexing 165

What should I index? 167
 Indexing definitions 169
 Indexing tasks 170
Cross-indexing 171
Using primary and secondary entries 172
“See” and “See also” entries 173
How long should my index be? 175
Editing your index 175
Some helpful tips 178

Chapter 11: Final preparation—production editing 181

The impact of structured authoring on production editing 183
Preparing content for production editing 184
Production editing for printed documents and PDF files 185
 Hyphenation and bad line breaks 186
 Page breaks and copyfitting 187
 Widows and orphans 188
 Right/left pagination 189
 Running headers, running footers, and pagination 190

Consistency in presentation of tables and figures	191
Page numbers in cross-references	192
Production checklists for printed and PDF content	192
Preparing final output for printing and PDF distribution	194
Production reviews for online content	195
Line breaks in online content	195
Consistent formatting	196
Navigation and links	197
Graphics and rich media	198
Chapter 12: Avoiding international irritation	201
Some basic definitions	202
Did we mention audience?	203
Language is an eight-letter word	204
More on mores	206
Some common-sense rules for international writing	206
The myth about images	210
Much ado about taboo	211
Screening your graphics	212
Formatting that won't hurt you	213
Text expansion	213
Other problems with tables	216
Follow that template!	218
Structured authoring and localization	219
Think globally, act locally	219
Chapter 13: Structured authoring with XML	221
What is structured authoring?	222
Elements and hierarchy	222

- Element attributes 224
- Formatting structured documents 225
- What is XML? 226
 - XML syntax 227
 - Defining structure in XML 230
- The impact of structured authoring and XML on writers 231
- Structured authoring and single sourcing 233
- Structured authoring with DITA 234
 - Writing topics 235
 - Collecting topics to create content 236
 - Creating output from DITA content 238
 - The good, the bad, and the ugly of DITA 239

Chapter 14: Web 2.0 and technical communication 243

- Cardinality in communication 244
 - One-to-one 245
 - One-to-many 246
 - Many-to-one 247
 - Many-to-many 247
- User assistance in a Web 2.0 world 248
 - Search 249
 - Blogs 252
 - Blog comments for user assistance 253
 - Forums 256
 - Wikis 258
 - Evaluating credibility 258
 - Advantages and disadvantages of Web 2.0 content 262
 - Where professional technical communicators are most valuable 263
 - Where users are most valuable 264

Technical Writing 2.0 264

Integrating Web 2.0 and user assistance 265

Appendix A: Getting your first job as a technical writer 267

Demonstrating the skills of a technical writer 268

 Understanding of technology 269

 Writing ability 275

 Organizational skills 276

 Detective and people skills 277

Interviewing 277

 Dress professionally 277

 Don't oversell 278

 Don't ask about salary 279

 Be on time 280

 Send a thank-you note 280

The portfolio 281

 What should my portfolio look like? 282

 Should I bring my portfolio to the interview? 283

Where should I look for a tech writing job? 283

 Contracting—getting your foot in the door 284

 Transferring within a company 285

 Start-up companies 285

 If you've got it, flaunt it 286

 Internships 286

Professional organizations and networking sites 287

Working as a freelance technical writer 287

 What you need to make it as a freelancer 287

 How much experience do I need to begin freelancing? 289

Appendix B: Resources 291

General technical writing 292

 Mailing lists 292

Editorial 293

 Print 293

 Web sites 293

Audience and task analysis 294

Information design 294

Indexing 294

Management 295

 Print 295

 Mailing list 295

Single sourcing 295

FrameMaker 295

 Print 295

 Web sites 296

 Mailing lists 296

XML and DITA 297

Other tools and technologies 298

 Web sites 298

 Mailing lists 298

Professional organizations and conferences 299

Social networking sites 300

Ergonomics 301

Job listings 301

Appendix C: Sample doc plan 303

Index 311
