## **Preface 5**

- Hardware and software requirements 5
- Installing the files from the CD onto your hard drive 7
- Completing the exercises in this book 8
- Conventions used in this book 9

## **Chapter 1: Using tags and master pages 11**

- Verifying the FrameMaker interface 12
- Applying and importing paragraph and character tags 14
- Importing formats 18
- Applying paragraph tags 19
- Applying character tags 20
- Creating a new paragraph tag 21
- Creating a new character tag 24
- Applying master pages 26

## **Chapter 2: Using cross-references 27**

- Inserting an internal cross-reference 28
- Inserting an external cross-reference 30
- Creating a new cross-reference format 31

## **Chapter 3: Working with tables 33**

- Creating a table tag 34
- Creating a straddle cell with custom ruling and shading 37
- Creating an invisible table tag 39
- Creating a table from text 40
- Sorting a table 42

**Chapter 4: Text management tools 45**

- Turning on automatic change bars 46
- Checking spelling on one page 47
- Finding and changing text 49
- Using the thesaurus 51
- Counting the words in a document 53
- Comparing two versions of a document 54

**Chapter 5: Using anchored frames and the graphics toolbox 57**

- Inserting an anchored frame 58
- Using the graphics tool 60
- Importing and scaling vector graphics 63
- Importing and scaling bitmap graphics 65

**Chapter 6: Using variables 67**

- Inserting a system variable 68
- Modifying a system variable 70
- Creating and inserting a user variable 72
- Modifying a user variable 74

**Chapter 7: Using conditional text 75**

- Applying condition tags 76
- Creating condition tags 77
- Showing/hiding conditional text and condition indicators 78
- Removing condition tags from text 80

**Chapter 8: Creating book files and generated lists 81**

- Creating a book file 82
- Inserting index markers 85
- Generating an index 87
- Generating a table of contents 89

**Appendix A: What's new in FrameMaker 7.2 91**

- Toolbar modifications 91
- Multiple undo/redo 93
- More structured templates 93

Support for the Darwin Information Typing Architecture (DITA)	94
Enhanced conversion to structured FrameMaker	94
Support for Extensible Stylesheet Language (XSL)	95
Support for schema	95
New documentation on migrating to structure	96
